Development Narrative

Grove Park Rowhomes Planned Development Overlay District

GENERAL PROJECT DESCRIPTION

This property is currently zoned C-1B (Neighborhood Business District). The proposed development will be using a base-zone of R-4 (Multi-Family 4-Plex) and will include twelve (12) attached, single-family buildings with four (4) to six (6) units per building. All units will have two (2) means of egress. The type “A” units have detached garages with access to the garage from an alley. The Type “B” and “C” units have front-loaded attached garages.

The Grove Park Planned Development Overlay District is being requested, within the underlying R-4 zoning district to 56 dwelling units (184 bedrooms), private streets, open space with a pond,

COMPLIANCE WITH THE PURPOSE OF THE OPD DISTRICT

This proposed development complies with the purpose of the Planned Development Overlay District by incorporating single-family units with a variety of unit types. The two-story, single-family units are compatible with the existing residential uses to the west and south.

DEVIATION FROM DEVELOPMENT STANDARDS

Lot Dimension Standards

Lot Frontage Width

R-4 district =	80 feet
OPD District proposed =	27 feet per unit

Lot Depth

R-4 District =	100 feet
OPD District proposed =	80 feet

Lot Area

R-4 District =	16,000 SF
OPD District proposed =	2,200 SF per unit

Front Yard Depth, Principal Use

R-4 District =	20 feet
OPD District proposed =	10 feet

Side Yard, Two Story	
R-4 District =	12 feet
OPD District proposed =	10 feet
Rear Yard Depth	
R-4 District =	30 feet
OPD District proposed =	15 feet

The “per unit” lot frontage and lot area values allow for rowhouse / townhome units to be built but sold as individual lots. This arrangement allows homebuyers to obtain more favorable financing which would otherwise not be available if they were structured as a condominium.

The above deviations from the base zone are to allow for rowhouse / townhome style development on this transitional property between the duplexes to the west, commercial lots to the east, and townhomes and condominiums to the south. The net density is approximately 11 units/acre which is a significant reduction from the previously approved PAD for this property.

Open Space

The requirements for 5% open space results in approximately 0.29 acres of open space. The developer proposes constructing a public walk within the Highway 6 right-of-way along the entire frontage of the property (500 feet). The streets and walks within the development will be connected to this public walk, creating a safe and efficient route for the residents of the development to access Jim Bartels City Park. The west boundary of the park is located approximately 300 feet east of the development property. The walking time from the center of the ball diamonds at the park to the center of the development is approximately 5 minutes (1,200 feet).

PHASING PLAN

The project will be completed in four phases. The first phase will consist of two buildings containing a total of nine units. The first phase will include the construction of the sanitary sewer from the southeast corner of the site to Phase 1 in the northwest corner. It will also include the construction of the storm water basin. This will ensure that the first phase and all subsequent phases meet the storm water requirements of the site.

Phase 2 will continue to the south of Phase 1 with the extension of the west alley and the Central Drive. This phase will add four additional principal buildings containing 19 units. This phase provides a looped street network and completes a looped water main. Emergency access is also provided at the southwest corner of the site to provide for two means of access.

Phase 3 fills in the southeast corner of the site with the addition of three principal buildings containing fifteen units. This phase adds the east alley. Temporary emergency turn arounds will be constructed where the alley length exceeds 150 feet.

Phase 4 completes the development by adding the last three principal buildings and 13 units. Upon its completion, the water main will be a true looped system with two connections to the main located along Highway 6. Further, the streets will be connected with no dead ends longer than 150 feet.

DESCRIPTION OF DESIGN THEMES AND STANDARDS

The design theme of the single-family rowhomes utilizes an urban feel and residential scale that creates a natural transition from the commercial properties to the east to the residential properties to the west. The north units are designed to front on Highway 6 which is appropriate for an urban highway.

RESTRICTIVE AND PROTECTIVE COVENANTS

Being a planned development the developer will oversee all infrastructure and building construction within the proposed district eliminating the need for covenants.

LEGAL DESCRIPTION AND LOCAL ADDRESS

Legal Description: The 5.86 acres described is that of Lot 30, Tiffin East as recorded on the final plat.

Addresses will be Grove Park Drive designations with each building having an address number and each unit within the buildings having an additional number or letter designation. The developer will work with the city and emergency services to properly designate all addresses within the proposed district.
